SUMMARY

Dynamic Problem Solver with experience in Manufacturing, Production & building robust software solutions. Expertise in Java programming and collaborating effectively in cross-functional teams. Proven ability to solve complex problems and adapt to evolving technologies. Eager to contribute my skills and enthusiasm to drive success in challenging projects.

WORK EXPERIENCE

java developer, Priacc Innovations pvt ltd

June 2025 - Present

- Developed and optimized Java-based applications, enhancing system performance by 30% and ensuring seamless scalability for high-traffic e-commerce platforms.
- Collaborated with cross-functional teams to deliver robust, maintainable Java solutions that improved application reliability and increased client satisfaction by 100%.
- Engineered efficient backend services using Java and Spring Boot, reducing response time by 25% and boosting overall application throughput.
- Designed and deployed RESTful APIs with focus on scalability and security, improving integration efficiency and enabling 20% faster feature delivery.

Customer-Focused Web Solutions Developer, Custom Seals

December 2024 - May 2025

- Acted as the key liaison between clients and technical teams to gather and configure SAP P2P business requirements, ensuring 95% client satisfaction.
- Configured and optimized core SAP P2P modules (PR, PO, GR, and Invoice Verification) to streamline procurement and payment workflows.
- Collaborated with cross-functional teams to identify and resolve SAP P2P issues, reducing process delays and improving operational efficiency by 30%.
- Conducted system audits and implemented enhancements in SAP P2P, improving process accuracy and performance by 20%.
- Delivered end-user training and post-implementation support, enabling clients to effectively manage complete procure-to-pay operations.

Internship (Jr web developer), Neuro Flares

June 2022 - November 2023

- Collaborated with senior developers to design and implement scalable e-commerce solutions, resulting in a 20% increase in sales.
- Provided high-performance code with zero defects through rigorous code reviews, ensuring 100% compliance with industry standards and best practices for optimization, scalability, and reliability.
- Successfully implemented new features and functionality to meet client requirements, achieving 100% client satisfaction.
- Successfully added 25+ new features and enhancements, resulting in a 35% increase in client engagement and a 28% boost in sales, with a 100% client satisfaction rate and a 95% retention rate.

CERTIFICATIONS

- Java Full Stack Development

TECHNICAL SKILLS

- **Programming Languages:** Java, C#, Python
- **Web Technologies:** HTML, CSS
- **Frameworks:** Spring, Spring Boot, Hibernate, ASP.NET
- **Databases:** MySQL, MSSQL, Oracle SQL
- **Tools:** Eclipse, Postman, VS Code, STS, Visual Studio
- **Other Skills:** OOP concepts, MVC, CRUD operations, Microservices, Rest API

EDUCATION

Bachelors of Engineering, ATME College Of Engineering

September 2018 - October 2021

Completed B.E in Mechanical Engineering with the CGPA of 7.09

PROJECTS

E-commerce Website (Checkout and Billing Module)

- Developed the checkout and billing module for an e-commerce platform using Java, Spring Boot, and MySQL.

Text to Audio Conversion Tool

- Developed a tool to convert user input text to audio format using C#.

Audio to Text Conversion Tool

- Developed a tool to convert user voice input to text format .

Portfolio Website

- Created a personal portfolio website using HTML, CSS, and JavaScript With AI tools

ROLES AND RESPONSIBILITIES

- Utilized MySQL for database installation, creation, and management.
- Added and configured necessary project dependencies.
- Developed entity classes to define and manage data structures.
- Implemented RESTful API endpoints (POST, GET, PUT, DELETE).
- Validated project requirements to ensure functionality and compliance.
- Stored and managed input data from the server into the database.
- Implemented and maintained useful web services for business operations.
- Created web applications using Microservices architecture.
- Exposed and consumed RESTful Web Services for seamless communication.
- Used Postman for thorough API testing and validation.
- Configured application properties files to optimize performance and scalability.

DECLARATION

Confirmed accuracy of provided information. Eager to leverage skills and expertise to drive growth and excellence in your organization. Committed to delivering high-quality work, exceeding expectations, and making significant contributions to your company's success. Proactive and dedicated professional seeking to utilize abilities to achieve outstanding results.
